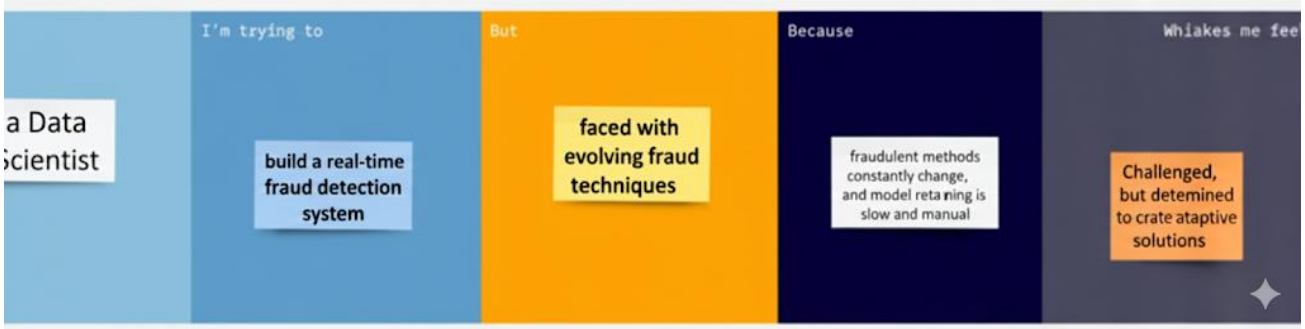
Project Name	Online Payments Fraud Detection using Machine Learning
Maximum Marks	2 Marks

Customer Problem Statement Template:

A well-defined customer problem statement helps us understand the real challenges faced by users and businesses in online payment systems. It allows us to empathize with customers and design an effective fraud detection solution..

I am a Data Data Scientist	Identify key role and role ow and background	Working to saferguad financial transactions from from fraud.
I'm trying to	List primary projey project goal	Build an effective, rrame-rraud detection system.
but	Describe what problems or barrriers stand achiect moet	Descring models have high false posstives rates & new fraud patterns.
because	Describe unroot cuse^e underynges reasons	Fraudlident techniques constantly evolve, and model model rettarning is slow manual.
which makes me feel	Explain the root cause? why problem barrier exist needs bu solved?	Frustrated by limitations, but determined but deterninet hews, how does roeate a robust, adaptive soaptive solution for greater tmer security and trust.

Example:



Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	I am an online payment user	I'm trying to make secure digital transactions	But I am worried about fraud and unauthorized transactions	Because cybercriminals can misuse my account details	Which makes me feel unsafe and anxious while making payments
PS-2	I am a bank / fintech company owner	I'm trying to protect customers and reduce financial losses	I'm trying to protect customers and reduce financial losses	Because fraud patterns are complex and continuously changing	Which makes me feel concerned about security risks and business losses
